# **WEATHER OF CONCERN**

## **Weather of Concern**

- Gusty offshore flow and unseasonably dry conditions will bring elevated fire weather concerns through Thursday to Los Angeles and Ventura counties.
  - Today is the most concerning day, when the winds peak.
  - Red Flag Warnings are in effect for most of the valleys and mountains of Los Angeles and Ventura counties today.

## **Active Weather Warnings, Watches and Advisories by County:**

- <https://alerts-v2.weather.gov/counties/CA>

# **WEATHER SYNOPSIS BY REGION**

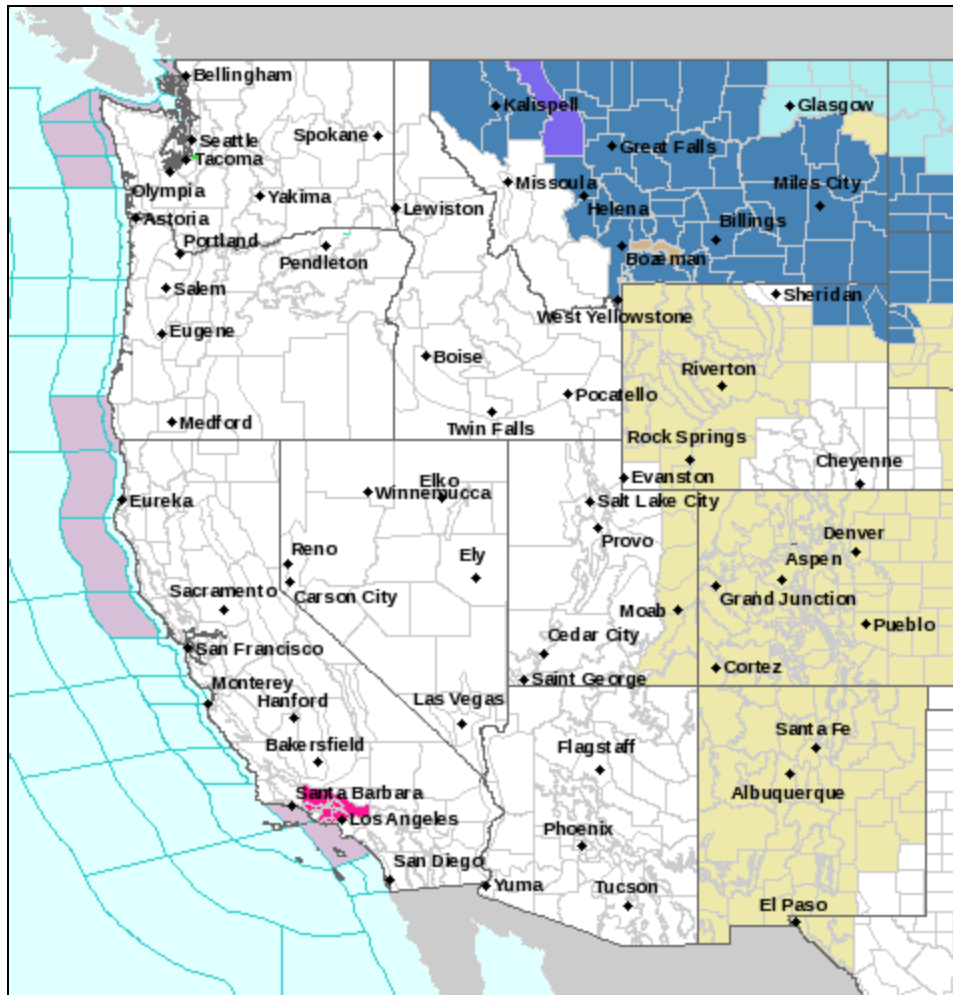

## **NORTHERN CALIFORNIA**

Strong high pressure just west of CA will be stationary through Friday. This pattern will produce mostly clear skies and well above normal temperatures under a dry NW-N flow aloft. Afternoon temperatures will be as much as 20 degrees above normal with minimum RH in inland areas reaching 15-25%. N-NE gusts will only reach 25 mph or so through Friday, and mainly during nights and mornings. A fairly strong but mostly dry cold front will move from north to south across the region Friday night. Isolated to scattered rain showers and mountain snow showers are possible in far eastern areas Friday night and early Saturday, but all other areas will remain dry. N-NE winds following the front could gust to 50 mph or more in the usual areas from the western Cascade-Sierra slopes to the coast Saturday and Sunday.

## **SOUTHERN CALIFORNIA**

There will be very little change in the weather today as strong high pressure remains centered well off the California Coast. Maximum temperatures will be well above normal away from the coast, with upper 50s and 60s across the mountains and 70s to low 80s in the valleys. Minimum humidity will be mainly between 12% and 25% away from the coast and San Joaquin Valley. Winds will be light. The strong high pressure area will approach the coast causing temperatures to warm to the 60s to low 70s across the mountains and mid 70s to mid 80s in the valleys today and Thursday. Minimum humidity will drop mainly into the single digits and teens today and Thursday. Local northeast to east winds of 10 to 20 mph with gusts to 35 mph will surface across the mountains and below the canyons and passes of Southern California through Thursday morning. Temperatures will cool a few degrees and humidity will increase a little Friday as the strong high pressure area gets pushed further off the coast. A trough will come from the north bringing significant cooling Saturday through Monday. Depending on the exact track of this trough, will determine if scattered showers develop and whether gusty winds will be onshore or offshore.
